Office of the Minister

131 Legislature Building, Edmonton, Alberta, Canada T5K 2B6 403/427-2137

91-04599/

January, 1990

Alberta's agriculture industry is a vital renewable resource. Its diverse sectors are important to all Albertans — as an employer, creator of revenue and supplier of food.

The agricultural and food processing industry is one of the fastest growing sectors in our economy. It's an industry continually researching, planning and developing to become bigger and better. Already the agri-food sector is a multi-billion dollar industry and is continually expanding in processing, manufacturing, transporting and retailing agricultural and food products world-wide.

The Alberta Government recognizes the growth of this valuable industry and places great importance on its development and continued diversification.

To promote the expansion of this industry, we provide the "Directory of Alberta's Agricultural Processing Industry." This directory is a dependable index of names, locations and products of members of Alberta's agricultural processing industry. It is specially designed to help those of you in the business community, government agencies and others, to keep pace with the rapid development occurring in the agri-food processing sector.

Every effort has been taken to ensure accurate and current information in this directory. We trust it will be a useful reference for you, as well as furthering the advancement of Alberta's agri-food processing industry.

Ernie Isley
Minister

Shirley McClellan
Associate Minister

FOREWORD

The Marketing Services Division of Alberta Agriculture presents this Directory of Alberta's Agricultural Processing Industry as a reference for use by the business community, government agencies and other interested parties. It serves to update users with current company information including contact personnel, products and brand names.

The directory has been divided into three sections.

(1) Company Listing by Product Category
Firms are listed under a broad industry category which represents their major processing activity and not necessarily under each category in which they participate. A category description precedes each listing.

(2) Index by Company
Firms are listed in alphabetical order, with location indicated where necessary. This section has been page referenced for convenience.

(3) Index by Location
Firms are listed by their location. An Alberta map has been included for reference purposes.

Considerable effort has been made to ensure accuracy of the company listings and information shown and we regret any errors or omissions. The Directory was prepared by the collection of information available to the Alberta Department of Agriculture and neither the Department nor any of their employees assume any legal liability or responsibility for the accuracy, completeness or usefulness of the information contained herein. The listing of any company or product in this guide does not reflect an endorsement of the company or product by the Alberta Department of Agriculture.

We ask your assistance in keeping this directory current. As changes occur in the information presented for any company listed, or if you are an Alberta processor and wish to be included in the next edition, please contact:
